Informal settlements

SANITATION FACTS:

- Safe and dignified sanitation leads to healthier communities, healthier countries and healthier economies.
- The environmental credentials of the Enviro Loo system ensure that the surrounding land is safe for agricultural use, thus delivering long term economic benefits by limiting the threat of food supply contamination.
- The operational costs of the Enviro Loo system are minimal as wind and sun are used for energy and no water is required – with water costs at a premium and also a scarcity this is a huge cost saving over traditional systems.
- The Enviro Loo is easy to install with low annual maintenance costs and servicing requirements; ensuring that the disposal of human waste is clean, efficient and safe.
