SANITATION FACTS

- Safe and dignified sanitation leads to healthier communities, healthier countries and healthier economies.
- Land contamination from human excreta causes health issues and also agriculture issues (land and livestock). The disposal of the human waste by Enviro Loo eliminates any land contamination. The Enviro Loo does not use any chemicals, ensuring a 100% environmental friendly system.
- The Enviro Loo utilises technologies that safeguard the environment and therefore has a major impact on the long-term sustainability of the Enviro Loo system.
- The Enviro Loo system is hygienic, eliminating potential for disease and illness thereby reducing work absenteeism through ill health and increasing productivity.
- The Enviro Loo is easy to install with low annual maintenance costs and servicing requirements; ensuring that the disposal of human waste is clean, efficient and safe.
